

Datira Date Derivatives

Product & Application Pack

Date powder, date paste, and date molasses for food and beverage applications.

B2B ingredient document for manufacturers, ingredient distributors, importers, and commercial partners.

Datira supplies Saudi date derivatives for B2B food and beverage applications. The products are positioned as functional food inputs, not only sweeteners.

Date Powder

Dry date-based ingredient for dry mixes, beverage concepts, bakery mixes, snacks, and product development.

Date Paste

Smooth date-based ingredient for fillings, bars, dairy concepts, confectionery, and bakery.

Date Molasses / Syrup

Liquid date-based ingredient for sweetening, flavoring, dairy, beverages, sauces, and desserts.

Key value points: natural date profile, flavor and aroma contribution, energy source, and relevance for dairy, beverages, bakery, snacks, and sports nutrition.

A dry date-based ingredient suitable for dry mixes, beverages, bakery applications, snacks, and product development concepts.

Typical Applications

- Dry beverage mixes
- Milk powder blends
- Smoothie mixes
- Bakery mixes
- Energy products
- Healthy snack formulations

Possible Packing Options

- Bulk industrial packing
