PROBLEMS? I HAVE THE SOLUTIONS

FULL TRUCKLOAD BAZAR

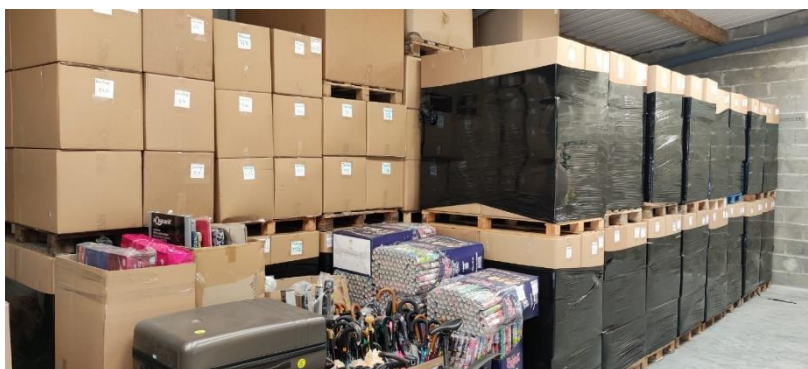

We have a contract with a European chain of stores that allows us to collect their products that have been on sale in stores (never customer returns) with only a one-month rotation agreement.

These products are **new, with their labels and prices**, and have not been sold for reasons such as price, stock, etc.

We do not have a defined packing list so the information we provide is the number of items and the approximate retail value.

In this category of clearance items, you can find various products:

- Household items
- Garden
- Kitchen
- Bathroom
- Cosmetics
- Personal hygiene
- DIY items
- Toys
- Stationery

Since 2026, we have started to offer **FILTERED bazar: we separate textil, shoes, books, agendas, magazines, expired dog food... leaving a top quality bazar!**

For filtered trucks, we prepare 32 pallets of these goods. Customers can choose filtered or unfiltered trucks.

We have a **constant flow of 50 trucks per month** and offer these products at two different points of sale:

1 → Full truckload 32 pallets.

A daily updated list of available trucks is provided, with the number of items and retail value. These are generally trucks carrying between 35,000 and 60,000 units, with a purchase price between 6.000€ and 11.000€.

FILTERED TRUCKS: purchase price between 9.500€ and 9.900€

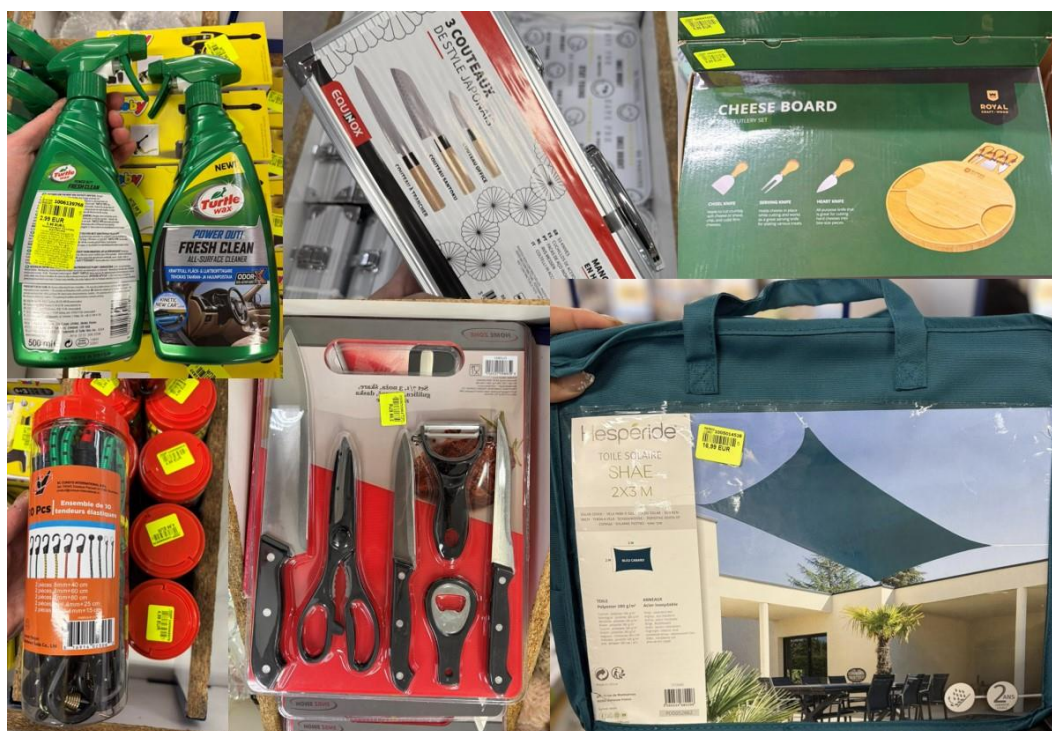

2 → Full double truck 64 pallets (manual loading) = 1 CONTAINER

Two trucks are reserved in advance and loaded by hand into one of them. We do this directly at one of our logistics centers. Double balances are generally between 70,000 and 110,000 units, with a purchase price between 11.000€ and 19.000€. **Hand loading charge of 300 eur of 4 hours approx.*
